In the latter part of September two bales of cotton belonging to Crow Brothers disappeared from their place at the cotton platform. Investigation disclosed the fact that two bales answering the description had been bought by Mr. J. D. S. Plyler. Mr. Plyler found that he had bought the cotton from Horace Williams, who had been buying here for Sprunt this season. Williams left Monroe at this juncture and has been arrested in Eldorado, Ark., and will be brought back to Monroe on the charge of larceny of the cotton.

Claude, the sixteen year old son of Mr. and Mrs. J. I. Sherrin of Mint Hill, died Wednesday of typhoid pneumonia. He had been well up to October the 2nd, when he became violently ill. Reall One Cent Sale Big Success.

The Union Drug Company's One Cent Reall Sale, which started Thursday, is meeting with great success. On the first day crowds swarmed around the store, and several extra salesmen had to be secured to assist the regular force in waiting on the many customers. Certain lines were sold out entirely the first day, but there are still many good bargains to be had.

Mr. W. A. Underwood, the factory representative, said that the first day of the local firm's sale was the biggest he had ever experienced in his rounds all over the country.

The sale continues today and tomorrow.

Death of Mr. Matthew Gordon.

Another good old citizen and faithful Christian of Union county passed away in the death of Mr. Matthew H. Gordon, which took place at his home in West Monroe township last Friday. Entertainment by High School Students.

If you want to enjoy yourself don't miss the home talent Carnival to be given by the Monroe High School pupils at the grammar school building at eight o'clock Friday, Oct. 27.

Even the old folks will enjoy the swimming match, the "Live Lobster," and everyone will enjoy the music made by the Human pipe organ, and if you want a great big laugh, go to the "Old Plantation."

There will be numerous other attractions such as fortune tellers, plenty of good music, a first class vaudeville and seven wonders of the world.

Sandwiches, ice cream and candy will be sold and every one will have a good time in general.

The High School pupils are working hard on this entertainment and if you have any interest in your school whatever, don't fail to patronize them.

A general admission fee of 10 cents will be charged.

The Journal Now \$1.50 to All.

As previously announced, the time in which old subscribers to The Journal could renew at one dollar a year expired Saturday night, October 7th. Hereafter the price is \$1.50 to old and new alike, spot cash, no premium, and no discount.

This increase in price of subscription is not sufficient to offset the increase in the cost of paper and other expenses that go into the make up of a paper the size of The Journal two times a week.

Other semi-weekly papers in the State the size of The Journal are already getting two dollars a year for their publications.

Why Need the Farmer to Care?

What in the thunder need a farmer to care

Who owns his own little place,

If foodstuff still goes higher and higher,

If he's plenty to feed his face.

Supposin' taters are fifty cents a peck

And corn and wheat too,

And eggs and the like too high to buy,

If you've enough to carry you through.

Since cotton's about twenty cents a pound,

And winters are so warm,

The folks down south are sassy like,

I mean the ones who farm.

Now the fellow who lives in city or town,

And eats from paper bags

Don't feel so gay these prosperous times,

With rents in his last year's rags.

Cause woolen goods have allers been high,

And now cotton's out of sight,

If this keeps up the man in town

Can go out only at night.

How a Machine Does Our Bookkeeping.

A short time ago we installed a remarkable machine in our Accounting Department—a machine which adds and subtracts, tells the date, keeps our books and gets out monthly statements. It does all this work much faster than any bookkeeper could, and has never been known to make a mistake.

INSURES ACCURACY.

The fact that our figure work is done on a Burroughs is a guarantee to our customers of absolute accuracy in the handling of their accounts. The machine method of ledger posting makes impossible for a mistake to get past unnoticed. This accuracy insurance alone is important enough to justify the use of the machine method, but there are many other advantages.

BETTER SERVICE TO YOU.

The Burroughs will handle our figure work in about half the time formerly needed. This gives us

more time for other things—time to improve the service in every department of the bank.

Come in and see our machine bookkeeping system in operation. We will be glad to show you how the machine makes entries in our books, how it automatically adds in one column, subtracts in another and so on and how it makes mistakes impossible. You will be welcome any time.

We don't want you to think of this bank just as a place to deposit your money, although of course we are glad to have you keep as large a balance with us as possible. It is our desire to render our patrons every service and accommodation that can be reasonably expected from us.

Talk over your business problems with us. It is part of our work to study business and financial conditions, and it may be that we can suggest some ideas that you will find worth while. Please feel free to consult us at any time.
